1099.—METALLIC ORES, N.E.C., TOTAL														

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.
n.e.c. Not elsewhere classified.

[1]General statistics for most States are not shown separately in this table in order to avoid disclosing figures for individual companies or because of the relatively small size of the statistics. Such States are shown below for 1963, with the number of establishments in each State (and in parentheses the number of employees or employment-size range):

SIC 1081. Metal Mining Services: Maine, 2 (0-4); Connecticut, 1 (20-49); New Jersey, 1 (5-9); Michigan, 2 (20-49); Minnesota, 5 (273); Missouri, 9 (24); Kansas, 1 (0-4); Virginia, 1 (0-4); North Carolina, 1 (10-19); Georgia, 1 (0-4); Tennessee, 2 (20-49); Arkansas, 1 (20-49); Texas, 3 (10-19); Montana, 2 (20-49); Idaho, 3 (9); Wyoming, 5 (138); Colorado, 12 (77); New Mexico, 1 (0-4); Arizona, 8 (1,029); Utah, 7 (192); Nevada, 7 (226); Washington, 3 (3); California, 5 (9).
SIC 1092. Mercury Ores: Idaho, 2 (0-4); Arizona, 3 (8); Utah, 2 (0-4); Nevada, 8 (80); Washington, 2 (0-4); Oregon, 5 (4); and Alaska, 2 (0-9).
SIC 1093. Titanium Ores: New York, 1 (250-499); New Jersey, 1 (100-249); Virginia, 1 (20-49); Florida, 4 (455); and Idaho, 1 (0-4).
SIC 1094. Uranium-Radium-Vanadium Ores: North Dakota, 6 (23); South Dakota, 20 (78); Texas, 7 (50-99); Idaho, 3 (20-49); Arizona, 14 (302), Nevada, 2 (0-4); Washington, 4 (55); Oregon, 1 (0-4); California, 7 (14); and Alaska, 1 (10-19).
SIC 1099. Metallic Ores, N.E.C.: Pennsylvania, 1 (0-4); Ohio, 1 (10-19); South Dakota, 1 (50-99); South Carolina, 1 (10-19); Montana, 1 (0-4); Idaho, 3 (0-4); Wyoming, 1 (0-4); Colorado, 8 (7); New Mexico, 2 (0-4); Arizona, 2 (0-4); Nevada, 1 (0-4); California, 1 (10-19); and Alaska, 2 (20-49).

[2]Represents production. For the Mercury Ores Industry represents flasks (76 pounds each) of mercury metal. For the Titanium Ores Industry, represents thousands of short tons of titanium (ilmenite and rutile) concentrates. For the Uranium-Radium-Vanadium Ores Industry, represents thousands of short tons of crude uranium-vanadium ores.

[3]Service establishments were permitted to prepare one report for all mining services performed in the United States. The totals shown for number of establishments in this table, and all figures shown for number of establishments in other tables of this report, represent the counts of these reports. However, these reports contained data for total receipts for services, total employment on March 15 and for 1963, capital expenditures by State and county. All other region and State information in this table for mining services establishments was obtained by allocating the totals reported by each company on the basis of the reported county data. The number of establishments shown by region and State in this table (except in footnote 1) represents the number of county operations in such regions and States.

[6]Figures for lode gold services are included with those for copper ores services.

For 1963, represents establishments principally serving the following industries: Lode Gold, 2; Silver Ores, 4; Bauxite, 1; and Metallic Ores N.E.C. 3.

[7]Excludes data for 2 establishments in Alaska with total employment in the range 10-19.

[8]Includes data for 2 establishments in Texas with less than 5 employees.

All establishments represented open-pit mines with treatment plants, of which 5 used flotation methods, 4 used gravity methods, and some of these also used magnetic, sintering, and other methods.

[9]Includes production by industries other than Titanium Ores.

1 Includes employees at separately reported central offices and related facilities. These were not classified by type of operation
^ Excludes data for one establishment in Alaska with less than 5 employees.
2 Represents uranium-vanadium concentrates. Note that the sum of the products for all other types of operation is equal to the figure shown for the total production by all producing establishments.
- Not shown since the cost of supplies, minerals received for preparation, fuels, purchased electricity, and purchased machinery exceeds the capital expenditures.
